

Holes/Long Hollow Watershed Implementations (Lewis CD)

Program	Cropland Erosion Control
Lead Implementer	Lewis Conservation District
Funders	Idaho Soil and Water Conservation Commission, Private Party
Project Primary Contact	Karol Holthaus (Lewisscd@outlook.com)
Project Stage	Completed
Duration	2001 - 2005

Agricultural Projects & Practices ➤ Cropland Erosion Control

Holes Creek and Long Hollow Creeks are tributaries of Little Canyon Creek and both are listed on the 1998 303(d) list. The goal of the project was to develop and implement best management practices in order to successfully work toward meeting TMDL loading targets for sediment, bacteria, nutrients and temperature.

Key Accomplishments

- Conservation Crop Rotation (acres): **945.00 acres**
- Critical Area Planting (acres): **1.00 acres**
- Grade Stabilization Structure (number): **10**
- Grassed Waterway (linear feet): **1,841.00 lf**
- Nutrient Management (number): **22**
- Pasture & Hayland Planting (acres): **670.00 acres**
- Residue Management, Direct Seed (acres): **5,290.60 acres**
- Residue Management; No Till & Strip Till (acres): **16,189.00 acres**
- Sediment Basin (number): **5**
- Underground Outlet (linear feet): **11,002.00 lf**
- Underground Outlet (number): **14**
- Water And Sediment Control Basin (number): **1**

Project Themes

- Agricultural Lands
- Healthy Watersheds

Location

Expenditures

Expenditures by Funding Source to Date: \$791,807.00

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
